

ABA Instructor: Position training begins Summer 2018, with school work beginning Fall 2018.

Come join an awesome team of behavior analysts working to support and enhance the lives of children! Become an ABA Instructor and get full-time, hands-on experience working with special populations in schools all throughout NH.

Current student populations have been shifting towards more specialized education, and within that, towards higher levels of need and intervention to support an inclusive model and students with complex learning needs. Current support staff for special education may not have the proper training or expertise to support high-level need students. That's where Constellations' ABA Instructors come in!

As an ABA Instructor you will facilitate more complex and advanced programming and higher levels of training for school personnel to help the district reach their goals more efficiently. An ABA Instructor from Constellations is a highly trained and supported staff member that demonstrates and enables best practice, evidence-based teaching strategies directly to and through current school professionals. ABA Instructors work alongside school Case Management to support, and even take on, the responsibilities of assessment, goal setting, and curriculum development. This is a full-time, integrated role within the school district that provides for consistent modeling and training. ABA Instructors are fully supported by Constellations' Clinical Team with frequent and ongoing BCBA Consultation.

This position is ideal for someone enrolled in a BCBA program and/or newly certified and looking to increase their application experience, training skills, and/or consultation skills for career growth!

Qualifications include:

- Bachelor's Degree in a related field to behavior analysis or education including special education, child development, and psychology among others
- Registered Behavior Technician (RBT) credential and direction application experience preferred
- Board Certified Assistant Behavioral Analyst (BCaBA) preferred
- Board Certified Behavior Analyst (BCBA) preferred
- Minimum three years' experience working with children and/or youths in education or ABA
- Minimum one year experience implementing and training others on the implementation of ABA

Benefits include:

- Competitive compensation
- Set schedule
- Health, Dental, Life, Short-term, and Long-term Disability Insurances
- Merit based bonuses
- 401(k) with company match
- Flexible Spending Account (FSA)
- Professional Development
- Employee Assistance Program
- Free mentoring towards Board Certification (BCBA)
- Be a valued member of a team of passionate and committed Behavior Analysts making a difference in the lives of our clients every day.
